Goods sent for and returned, free of charge, within three miles of the City; and all light goods received at the Works by 9 in the morning, will be returned the same day, if required.

A Discount allowed to the Trade.

MOREWOOD and ROGERS'S PATENT GALVANIZED TINNED IRON.

—Iron Tinned previously to being Galvanized. The attention of Architects, Engineers, and others is directed to the various uses to which this metal can be beneficially applied, viz. for all roofing purposes, especially of large span, either plain corrugated, arched and our curated, or in the form of tiles, for all sheds, barns, and buildings of a similar description, for the lining of tunnels, cisterns, and vaults; for gutters, rulers, and pipes of every description, plain and ornamental, nails, bolts, and rivets, iron hanging; and for all nautical purposes, sheathing, anchors, chains, &c.

ANDREW WHITTICK, 433, New Oxford-street, and Russell-street, Soho, begs to particularize the "Times," in size 3 feet long by 2 feet wide, prepared expressly of "Galvanized Tinned Iron" for the covering of timber roofs of the ordinary construction. They will be found to form a durable perfectly weather-tight covering, as neither rain nor snow can possibly be driven under the laps by the wind, and the unlucky accidents of "broken nights, with the annual rear-chaise for such repairs are avoided. A square of covering of 15 inches metal weighs about 14 cwt., while slating weighs from 7 to 10 cwt.; the first cost of covering a roof with this metal (on account of the great saving in wood-work is at least 25 per cent. less than a slated roof. A. W. begs to recommend the adoption of this metal for PANELS to DOORS, SHUTTERS, &c. (in ordinary framed joiners' work, as, independent of the security against burglars knees, shrinkages, and many other disadvantages of wood panels are avoided. For all rest of this metal and information as to its applicability to any purpose, all parties are referred to the Surveyor of the Patentees, Mr. GEORGE MORGAN, No. 22, Parliament-street.
